

SMARTPART - Total Pump Asset Management

It is a well-known fact that whilst the efficiency of rotating equipment has vastly improved over the years, the ordering of spares and management of equipment has not. Ceetak Engineering Ltd recognises this and have developed their unique SmartPart system.

SmartPart utilises the internet to give you total access to your pump data, maintenance logs and parts lists. Fast and simple ordering direct to Ceetak Engineering Ltd enables quick response and considerable cost savings.

SmartPart can be made available to cover the management of a vast array of plant and assets not just rotating equipment. Please contact Ceetak Engineering Ltd for further information on how SmartPart can be configured to your particular application.

- FAILURE MODE ANALYSIS**
- REDUCED DOWNTIME**
- REDUCED NON-CONFORMANCES**
- EXTENSIVE PUMP DATABASE**
- SINGLE SOURCE FOR ALL SPARES**
- SECTIONAL DRAWINGS**
- PERFORMANCE CURVES**
- ON-LINE ORDERING**
- PERFORMANCE HISTORY**
- FINANCIAL PERFORMANCE**
- EXTENSIVE REPORTING**

SmartPart 2

FULL ASSET DETAILS

Full details of the asset are stored including asset number, model details, serial number, operational conditions, speeds, design, fluids, pressures and location.

TECHNICAL LIBRARY

Virtually any document such as sectional drawings, performance curves and manuals can be stored in PDF format against each asset, model or group of assets.

EXTENSIVE PARTS DETAILS

The assets parts list can be easily view and printed. Simple on-line ordering allows purchasing of OEM parts direct from Ceetak Engineering Ltd

HISTORICAL DATA

Historical data can be stored in the assets on-line log book, logging all repairs, parts used and labour duration and costs. Ability to use the historical data for Failure Mode Analysis, Costing and Parts usage.

LIVE ON-LINE REPORTING

Extensive live reports can be generated on the stored historical data, and display in table or graphical formats. Ideal for failure mode analysis, repair costing between dates, identify bad performers and general model and manufacturer data.

PHOTOGRAPHS

Ability to store photographic data against each asset or model to help with identification and location.
